

# Camilla Abdulla

UX/UI Designer | Product Designer

+7 (707) 823-90-20 • camillaabdulla04@gmail.com • Almaty, Kazakhstan

## Summary

UX/UI Designer with nearly 3 years of experience designing digital products for FinTech, EdTech, MedTech, and AI platforms. Specialized in user research, complex user journeys, and scalable design systems. Contributed to the development of an AI healthcare platform that secured a grant of 40 million KZT. Open to full-time remote, hybrid, or on-site opportunities.

## Experience

### qBots

February 2026 – Present

UX/UI Designer

Astana

- Designed the end-to-end UX/UI of an AI-powered healthcare platform, including both the patient-facing application and a multi-role administrative panel for administrators, district nurses, and healthcare professionals.
- Designed a competition management module, including creation, editing, workflow configuration, edge-case handling, and notification logic.
- Built and maintained a UI Kit and reusable component library, ensuring visual consistency and accelerating feature development.
- Designed KPI dashboards and an Excel data export module for administrative users.
- Conducted competitive analysis and UX research for digital healthcare products while collaborating closely with developers and the Product Manager from wireframes through product release.
- Prepared presentations and pitch decks for startup incubators and partner programs, contributing to securing a 40 million KZT grant.

### Prodengi.kz

August 2025 – January 2026

UX/UI Designer

Almaty

- Designed UX flows for financial consultation requests and credit score services, reducing the number of steps in the user journey.
- Created wireframes, interactive prototypes, and high-fidelity interfaces in Figma for four ecosystem products: Prodengi.kz, TengeDa, Jetu.kz, and i.jetu.kz.
- Redesigned the Credit Score section, improving information architecture, FAQ, and page structure to increase service clarity.
- Developed a unified empty-state design and reusable modal component, improving interface consistency across products.
- Designed responsive interfaces for desktop and mobile, including redesigning the user dashboard and key user flows.
- Created conversion-focused banners and redesigned the Promotions & News section for TengeDa, as well as seasonal visual concepts for jetu.kz and i.jetu.kz while maintaining brand consistency.

### SparkLab by inDrive

October 2023 – August 2024

UX/UI Designer

Almaty

- Designed UX/UI for an EdTech platform providing tutoring for people with disabilities, with a strong focus on accessibility.
- Conducted usability testing and improved navigation and information architecture based on user feedback.
- Implemented a user feedback collection system that increased user engagement.
- Created and maintained the product design system, adapting interfaces for multiple devices and platforms.

### CyberBiz

August 2023 – January 2024

UX/UI Designer

- Designed user interfaces for a web platform focused on ticket booking and accommodation rentals.
- Developed interactive UI components and navigation patterns, optimizing page structure and improving usability.
- Created the product's visual identity and branding, adapting the design across different platforms and devices.

### International Robotics Academy

October 2022 – July 2023

Robotics Instructor

Almaty

- Taught robotics and engineering fundamentals to students aged 5–13, preparing teams for the VEX World Championship (Texas, USA).
- Organized large-scale technology events, including TechCup 2022, Digital Almaty, and the VEX World qualification tournament at Satbayev University.
- Designed promotional materials, banners, brochures, and branded merchandise for the academy.

## Education

Satbayev University – Bachelor's Degree in Software Engineering

2025

Lodz University of Technology (Lodz, Poland) – Bachelor's Degree in Information Technology

2025
